

Packaging for your life.

MAXI-B
THE REFILL BOTTLE
MADE OF 100% PCR ALUMINIUM

DESCRIPTION

Our largest aluminium bottle with a diameter of 53 mm and a GCM1 24/410 thread offers a broad range of applications in cosmetics, such as skin care and hair care. Due to its large diameter, the flexibly adjustable length and the wide opening, it is also ideally suited for refill systems.

For a more climate friendly approach, the bottles can be produced from 100% post-consumer recycled aluminium with a drastically lower carbon footprint.

The benefits of our LINHARDT bottle series are obvious: Our aluminium bottles are lightweight, shatterproof, opaque, aroma-proof and highly recyclable - all while being an elegant eye-catcher.

TECHNICAL DATA

- Diameter 53 mm
- Length: 93.5 mm - 185 mm
- Fill volume: 150 ml - 355 ml
- Thread: GCM1 24/410
- MOQ: 50,000 pcs.

YOUR BENEFITS

- **Significantly reduced carbon footprint** of PCR bottles compared to PET
→ Maxi-B 250 ml: **51% lower carbon footprint** than a comparable PET bottle, 78.20 g CO_{2e} per bottle (PET) vs. 38.08 g CO_{2e} per bottle (PCR aluminium)
- Usable as a refill bottle
- Multiple application choices, e.g. different lotion or spray pumps
- Shatterproof
- Excellent barrier properties: opaque & aroma proof
- Sophisticated aluminium look
- 360° inline direct print: Offset print with up to 8 colours, no label required
- Outstanding recyclability
- Quality "Made in Germany"
